## BOOK SYNOPSIS

This is a comprehensive text on the methods - dietary, anthropometric, laboratory and clinical - of assessing the nutritional status of populations and of individuals in the hospital or the community. This Second Edition incorporates recent data from national nutritional surveys in the US and Europe; the flood of new information about iron, vitamin A and iodine; the role of folate in preventing neural tube defects; the use of HPLC techniques and enzyme assays; improvements in data handling; and many other developments. A paperback edition of this book is available to readers living outside of North America and Europe. Interested parties should contact the author at: [rsgibson@nutrition.earthlight.co.nz](mailto:rsgibson@nutrition.earthlight.co.nz) <http://nutrition.earthlight.co.nz>
